

# Medication Management

## Leveraging bi-directional pharmacy integration

Technology provides an excellent medium for managing precise details and error checking.

Nowhere is this more important than when ordering and administering medications.

MEDHOST provides support for the continuum of medication administration – from triage to discharge.

Our extreme usability ensures that information is presented to clinicians in their normal workflow – when the impact to patient safety matters the most.

Drug, Route & Dose	Frequency	Reason	Last Dose	Continue on Discharge
Lipitor Oral 20 mg	daily	High Cholesterol	09/17/2010 06:00	Yes
