

# MEDHOST®

## An Innovative Vision for Healthcare.

The new paradigm of healthcare — defined by smaller budgets, mounting regulatory requirements and declining reimbursements — demands that providers increase quality of care without compromising financial health. No one understands this better than MEDHOST.

Uniquely positioned to deliver unparalleled value for better management of care and the business of healthcare, MEDHOST provides market- leading clinical, financial and healthcare engagement solutions. Whether the need is for a large corporate enterprise or a standalone facility, MEDHOST's wide range of solutions are designed to meet the needs of any healthcare facility.

Our offerings reflect a strong, company-wide product development culture, and our primary focus always remains on our Customers and how we can help contribute to their successes. MEDHOST possesses an in-depth, in-the-trenches understanding of the needs of today's healthcare provider and organizational processes empowering users to achieve their patient care and safety, compliance and financial goals.

## THE MEDHOST EXPERIENCE

We have an eye on the future and are setting the standard for how technology and services should be designed and how they should easily blend within the healthcare setting. MEDHOST solutions focus on the best usability and patient experiences possible. After all, if your clinical team and administrative staff don't fully adopt the technology you put in place, you will never reap the intended benefits or completely achieve your objectives.

- **YourCareUniverse™**

YourCareUniverse, Inc. provides an integrated, cloud-based solution for managing the digital patient and supporting the consumer in a way that enables a healthcare organization to be the trusted source of health information and services within their community.

- **MEDHOST Hosted and Managed Services**

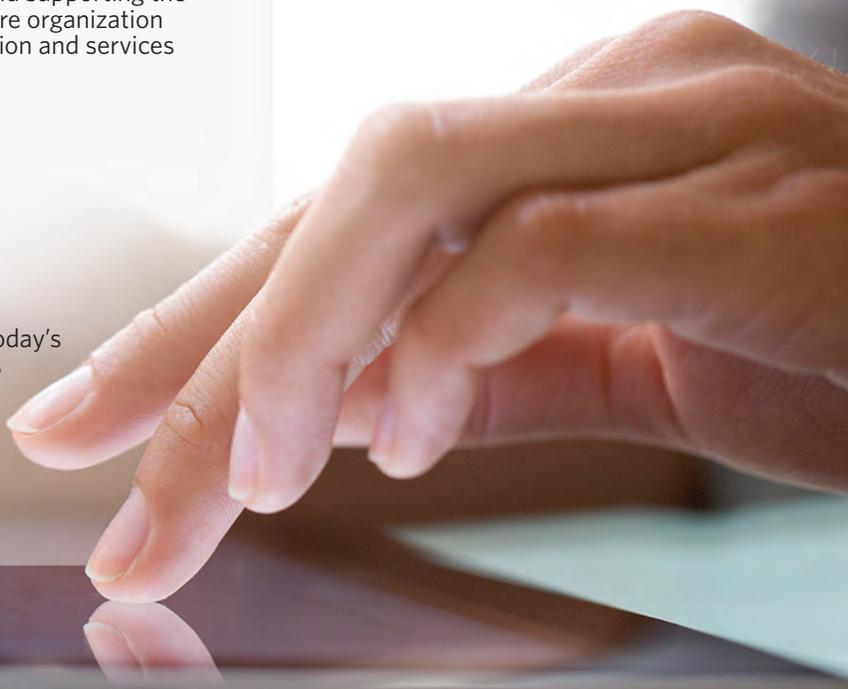

- MEDHOST Direct
- Managed IT Services

- **YourCareEverywhere™**

YourCareEverywhere serves the needs of today's healthcare consumer. It empowers patients with self-care tools by providing access to the nation's largest multi-tenant, cloud-based patient portal, daily-updated consumer health news and editorial content, wellness tools via consumer health device integration, and a clinically-integrated mobile iOS and Android app.

At MEDHOST, we strive to keep our finger on the pulse of what matters most and intimately know our Customers' needs and challenges.

# Solutions and Services

The challenging demands of operating a hospital are endless- from Meaningful Use to ICD-10 implementation to providing the best inpatient care while maintaining a healthy bottom line. All of this requires a seamless enterprise environment with every department working in unison.

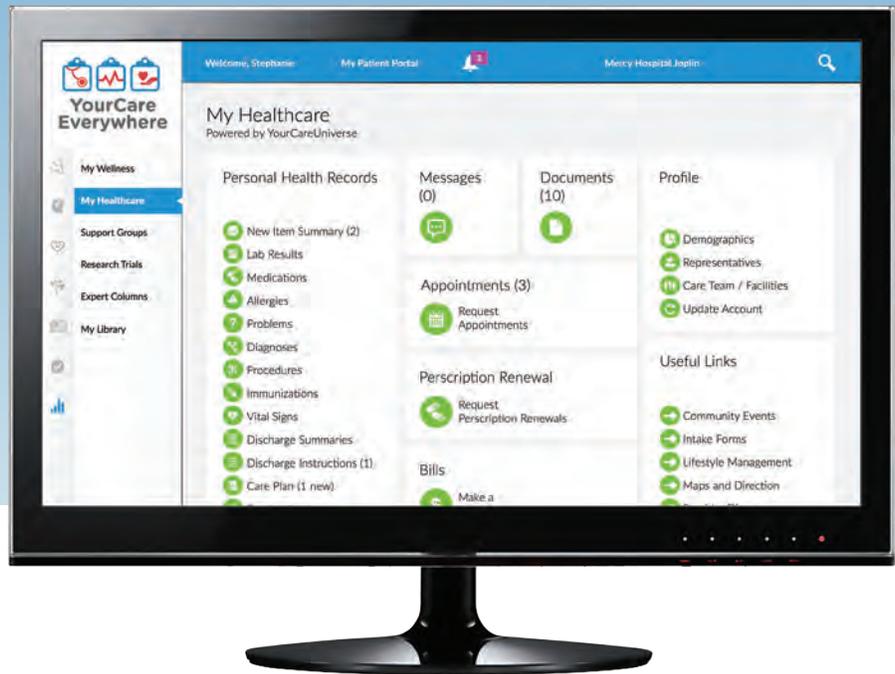

Whether it's a complete enterprise clinical and financial solution or intuitive application for specific departments in your facility, our Customers have come to appreciate the power of MEDHOST's tightly integrated and ONC-ACB-certified clinical applications and proven financial solutions.

Clinicians hail our applications for reducing the complexity of healthcare delivery, and administrators value the enterprise-wide visibility and control of operations. Whether in a standalone facility or as part of a multi-entity healthcare system, our integrated applications eliminate data silos that can break down operations, put patients at risk and affect profitability.

**i** We revolutionized emergency medicine by making powerful technology simple to learn and easy to use. For example, our EDIS includes intuitive, graphical floor plans of your ED that enhance staff communication and workflow through automated notifications, risk alerts and visual cues.

 YourCareUniverse provides patients and caregivers with online access to their Personal Health Records and tools to interact with their healthcare providers.

Customers cite the high usability of our applications as the key ingredient for their widespread adoption, which results in accurate documentation of care, efficient revenue collection and innovative engagement solutions.

At the forefront of graphical, touch-screen interfaces for healthcare, clinicians love MEDHOST, the biggest name in community engagement, enterprise patient flow, emergency department technology, business intelligence and surgical information systems.

MEDHOST Physician Experience has changed the game.

With direct input from our Physician Advisory Board, MEDHOST developed the Physician Experience to streamline the chart, note and order functionality with a contemporary and intuitive user interface that drives rapid physician adoption. This clinical suite is designed to enhance patient care and safety, create more efficient enterprise-wide processes, improve financial performance and enhance the patient experience.

# YourCareUniverse

We're revolutionizing how clinicians and hospital leaders work and communicate, and the results are outstanding with improved operations, patient flow, care and revenue.

YourCareUniverse's Cloud Platform lets you attack the future by giving you access to descriptive, prescriptive and predictive analytics at nine different levels. Integration becomes easy, smart, virtual and drives everyone into the logical chain of patient, provider and consumer interaction.

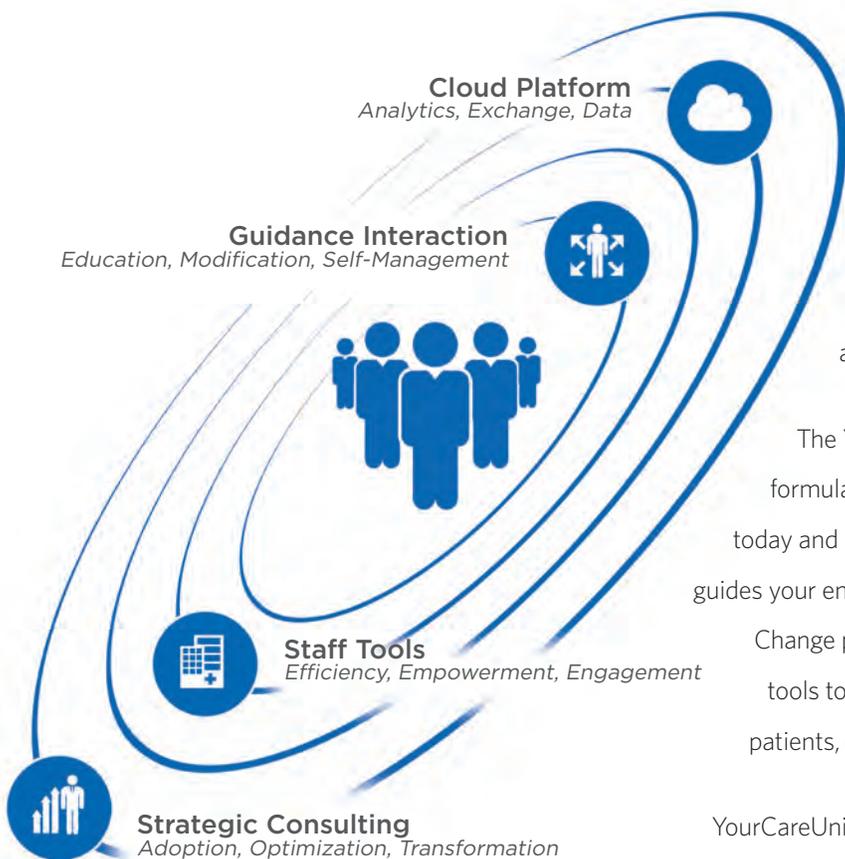

Guidance Interaction solutions enable you to be successful and achieve excellence by facilitating communication and the transmission of information between patients and providers. YourCareUniverse provides tools for secure asynchronous messaging, aggregation of data from wellness devices, access to a wealth of health content and the ability to track and navigate care of specific disease states.

Staff Tools that lead to new, virtual consumer behaviors, better patient experiences and game-changing organizational performance. This suite allows you to target specific patient profiles and customize messaging to the individual, facilitate referrals, customize reports and improve physician experience.

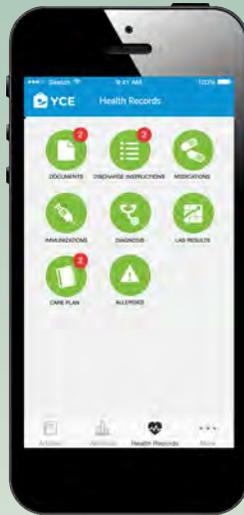

The YourCareUniverse Consulting Group has crafted a formula for success, balancing resources to be effective today and relevant tomorrow. This comprehensive program guides your entire organization through the Transformational Change process by providing customizable training and tools to communicate the benefits of YourCareUniverse to patients, consumers and staff.

YourCareUniverse gives you the power to thrive.

 YourCareEverywhere's Wellness Portal provides health consumers and patients with a personal, digital filing cabinet for the easy input, access and storage of personal wellness data. It is accessible from the web and via mobile app.

## YourCareEverywhere

YourCareEverywhere is an innovative, online health & wellness consumer engagement platform, providing an integrated ecosystem for transforming people, patients and populations.

The facility-branded health and wellness content site helps facilities build affinity and preference among today's connected healthcare-savvy consumers. Leverage the engagement tools and a facility-branded mobile app to virtually bond with active, health-conscious consumers before they have an immediate need for care. Users who choose to affiliate with your hospital through YourCareEverywhere can seamlessly move between health and wellness articles, caregiver-generated personal health information and user-generated personal wellness data in a secure, unified experience.

YourCareEverywhere is the ultimate consumer and patient engagement platform. Not only does it help ingrain favorable disposition toward your brand in the consciousness of the new health consumer, but it also allows you to cost effectively expand your online presence beyond your website and into a more interactive digital domain. YourCareEverywhere is an integrated component of the YourCareUniverse suite of solutions.

With YourCareEverywhere, providers get a facility-branded homepage and mobile app.

MEDHOST knows that data exchange, transparency and portability directly influence patient safety and satisfaction, care transitions, usability, clinician satisfaction, and Meaningful Use and other regulatory requirements. That's why we continue to make major investments in system, device and application integration for each of our departmental solutions. Few can claim they exchange data with all leading hospital information systems and EHRs, multiple HIEs, ambulatory departments, clinics and primary care provider systems.
