

MEDHOST Enterprise "Cost and Limitations"				
Capability	Description of Capability	Costs or Fees	Contractual Limitations	Technical or Practical Limitations
		<i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>	<i>Limitations of a contractual nature (including developer policies and other business practices) that a user may encounter in the implementation or use of the capability -OR- in the connection with the data generated in the course of using the capability</i>	<i>Limitations of a technical or practical nature that a user may encounter that could prevent or impair the successful implementation, configuration, maintenance, support or use of the capability -OR- prevent or limit the use, exchange or portability of any data generated in the course of using the capability</i>
Drug-Drug, Drug-Allergy Interaction Checks	During computerized provider order entry (CPOE), interventions automatically and electronically indicate to a user, drug-drug and drug-allergy contraindications based on a patient's medication list and medication allergy list.	A recurring monthly maintenance fee applies for the use of Medispan database support for pharmacy per MEDHOST instance. Additional monthly recurring costs apply for Spanish versions.	No contractual limitations	Either real time API or monthly batch update must be maintained to keep the interaction checking up to date.
Demographics	Enable a user to record, change, and access the preliminary cause of death and date of death in the case of a mortality.	A one time licensure, one time implementation and monthly maintenance cost may apply for the web based patient admissions/registrations user interface.	No contractual limitations	
Patient Specific Education	Patient specific education resources. MEDHOST Enterprise electronically identifies for a user patient-specific education resources based on data included in the patient's problem list, medication list, and laboratory tests and values/results. MEDHOST supports the use of the Info-Button standard, which pulls content from the National Library of Medicine.	A one time set up fee and recurring monthly maintenance fee apply for the use of YourCareUniverse Health Portal support.	No contractual limitations	No technical or practical limitations
Transition of Care	Allows the EHR user to receive, display, incorporate, create and transmit a transition of care/referral summaries.	Base licensing and subscription fee includes up to 10 seats (1 seat per registered clinician or user). Additional seats can be licensed under an additional subscription fee in lots of 10 seats. A connection fee will be charged to establish a connection to each third-party HISP with whom MEDHOST currently has no relationship. The cost of establishing connections can be substantial and may exceed the annual licensing and subscription fee in some cases. All costs are passed on to the customer(s) who requests the connection. Customer may incur additional one time expenses for interfacing with a non preferred HISP (Health Information Service Provider).	Transport of the Summary of Care requires the use of Secure Electronic Solutions, MEDHOST supported HISP.	MEDHOST Enterprise adheres to CCDa 1.1 and ITI-41 XDS.b (Provide and Register Document Set) standards. Transport of the Summary of Care requires the use of a HISP. MEDHOST preferred partner HISP is Secure Exchange Solutions.
e-Prescribe	MEDHOST Enterprise enables users to electronically create prescriptions and prescription related information for electronic transmission.	A one-time implementation service, license and recurring monthly maintenance fees apply based upon licensed beds.	Electronic prescriptions may only be transmitted to members of SureScripts network.	Requires the use of 3rd party software SureScripts. Pharmacy SCRIPT v10 & RXFILL message is not currently supported due to SureScripts network limitations.
Data Export	Enables users to electronically create a set of export summaries for all patients in EHR technology, which represents the most current clinical information about each patient and includes the Common MU Data Set: Encounter Diagnoses, Immunizations, Cognitive Status and Discharge Instructions	A one-time implementation service fee and recurring monthly maintenance fee applies. Maintenance includes MEDHOST support and standard release updates.	No contractual limitations	Reprocessing of QRDA (Quality Reporting Document Architecture) data is limited to processing one week's worth of data per request to prevent system overload. Multiple requests can be submitted to address time frames longer than one week. Reprocessing of QRDA files cannot be done for a single measure or facility, all QRDA's for a given time period must be processed. Providers may filter patient selection based upon patient name, admit date and date of birth.
Clinical Quality Measures	Enable users of EHR to capture, import, calculate and report on electronic clinical quality measures.	MEDHOST Enterprise solution requires the purchase of MEDHOST Business Intelligence to calculate and report electronic clinical quality measures. CQM data is captured and sent to MEDHOST Business Intelligence upon patient discharge. If collection of this data is found to be deficient due to improper build of enterprise assessment forms or mappings to proper vocabularies, an additional fee for reprocessing corrected cqm data captured on EHR systems may apply. Multi-facility or provider fees may apply. Multi facility/Provider fees may apply	MEDHOST Enterprise requires the use of MEDHOST Business Intelligence to support automated measure calculations, and clinical quality calculationaland electronic submissions.	Reprocessing of QRDA (Quality Reporting Document Architect) data is limited to one week batch to prevent system overload. Reprocessing of QRDA files cannot be done for a single measure or facility, all QRDA's for a given time period must be processed.
Transmission to Immunization Registries	MEDHOST Enterprise EHR technology is able to electronically create immunization information for electronic transmission to state immunization registries.	A one-time implementation service fee and a recurring monthly maintenance fee apply per interface. Additional fees may apply to meeting state registry requirements that are not consistent with ONC certification requirements. Any additional requirements imposed by local, state or federal immunization registries may not be supported by the base purchase of MEDHOST Enterprise and may require purchase of YourCareLink interface engine, which has one implementation, licensure and monthly support fees.	No contractual limitations	MEDHOST Connex provides basic electronic immunization capabilities, certified to the ONC 2014 Edition.
Transmission to Public Health Agencies	MEDHOST Enterprise electronically creates syndrome-based public health surveillance information for electronic transmission to registries.	A one-time implementation service fee and recurring monthly maintenance fee apply per interface. Additional fees may apply to meet state registry requirements that are not consistent with ONC certification requirements. Any additional requirements imposed by local, state or federal immunization registries may not be supported by the base purchase of MEDHOST Enterprise and may require purchase of YourCareLink interface engine, which has one implementation, licensure and monthly support fees.	No contractual limitations	MEDHOST Connex provides basic electronic registry capabilities, certified to the ONC 2014 Edition.
Transmission of Reportable Laboratory Test	MEDHOST Enterprise is able to electronically create reportable laboratory tests and values/results for electronic transmission to local, state and federal registries.	A one-time implementation service fee and recurring monthly maintenance fee apply per interface. Additional fees may apply to meeting state registry requirements that are not consistent with ONC certification requirements. Any additional requirements imposed by local, state or federal immunization registries may not be supported by the base purchase of MEDHOST Enterprise and may require purchase of YourCareLink interface engine, which has one implementation, licensure and monthly support fees.	No contractual limitations	MEDHOST Connex provides basic electronic laboratory registry capabilities, certified to the ONC 2014 Edition.
Automated Measure Calculation	MEDHOST Business Intelligence is a SaaS and cloud-based executive dashboard for C-level executives and quality administrators to monitor actionable data for Meaningful Use reporting. With hundreds of clinical and financial key performance indicators to analyze, Business Intelligence gives deep insight into operational and financial measures, increasing visibility enterprise-wide so the customer can improve overall facility performance.	A one-time implementation service fee and recurring monthly maintenance fee apply to utilize the MEDHOST Business Intelligence solution. If a non MEDHOST Business Intelligence solution is used, the customer may incur additional expenses related to one time interface development cost and monthly support fees. Additional fees may be incurred when updates to the 3rd party Business Intelligence solution occur. Additional fees may apply when supporting multiple facilities and/or provider groups.	MEDHOST Enterprise requires the use of MEDHOST Business Intelligence to support automated measure calculations or the customer contract with a 3rd party solution for Business Intelligence automated measure functionality.	MEDHOST Enterprise supports MEDHOST implementation of QRDA1.
MEDHOST Enterprise General EHR features	MEDHOST's clinical solutions were developed specifically to enhance the end-user's experience. Designed with the help of the clinicians themselves, these comprehensive clinical information systems are inherently accessible in our hospital information system and are designed to increase efficiency, enhance decision-making, and further patient safety and satisfaction initiatives. ONC 2015ed certified modules, 170.315: (a)(1), (a)(2), (a)(3), (a)(4), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9), (a)(10), (a)(11), (a)(12), (a)(13), (a)(14), (b)(1), (b)(2), (b)(6), (e)(2), (e)(3), (f)(1), (f)(2), (f)(3), (f)(4), (f)(7).	MEDHOST Enterprise, which was previously offered under the names Healthcare Management Systems Clinicals or MEDHOST Clinicals, contains modular certified features that may require a software license fee, a one-time implementation service fee and recurring monthly maintenance fee. Maintenance includes MEDHOST support, standard release updates. Subscription fees may be included in the MEDHOST master contract or billed monthly or annually by MEDHOST, as applicable.	MEDHOST Enterprise contracts are on a per facility basis unless otherwise explicitly stated in the contract.	Minimum hardware requirements must be met to support the MEDHOST Enterprise product. MEDHOST financials, eRx and Clinicals require the use of Internet Explorer version 11.
